

Velan S

velansivasankaran15@gmail.com — [linkedin.com/in/velans](https://www.linkedin.com/in/velans) — github.com/velan03 — velan-s.netlify.app

Education

Sri Muthukumaran Inst. of Technology

BE Computer Science
Engineering
Kancheepuram, Tamil Nadu
CGPA: 8.39 — Grad: June 2023

Skills

Languages

Advance: TypeScript — JavaScript
Intermediate: Python — Java
HTML5 — CSS3/SCSS — SQL

Tools & Technologies

Git — Docker — Azure DevOps
MongoDB — MySQL — Node.js
Spring Boot — Angular 20+
React.js — Next.js — NgRx
Redux — RxJS — PrimeNG
Bootstrap 5 — Tailwind CSS

Achievements

Academics

CGPA 8.39 – Top performer in
CSE department, 2023 batch.
Completed Java Full Stack at
QSpiders with distinction.

Coding

Built 4+ production-grade
enterprise apps at Tarkiz.
AI productivity gain of **35%**
using GitHub Copilot & Cursor AI.
Reduced dev time by **25%**
via reusable UI component library.

Coursework

- Data Structures & Algorithms
- Object Oriented Programming
- Web Technologies
- Software Engineering

Training

QSpiders – Java Full Stack
Sep 2023 – May 2024
React.js, TypeScript, APIs,
Docker, Git

Besant Technologies

Python & Data Science, 2023

Experience

Tarkiz Infotech Pvt Ltd — SOFTWARE ENGINEER

Jul 2024 – Present — Chennai, Tamil Nadu

- Architected enterprise web apps with **Angular 20+**, TypeScript & React.js; delivered role-based dashboards serving Admin, HR, Manager and Employee production workflows for **500+ concurrent users**.
- Integrated **RESTful APIs & WebSockets** for real-time data streaming, boosting frontend-backend performance by **40%**.
- Implemented **NgRx & Redux** state management across multi-module apps, ensuring predictable, centralized state and reducing state-related bugs by **30%**.
- Built reusable UI library with **PrimeNG, Angular Material & Bootstrap 5**, reducing development time by **25%** and enforcing consistent design system across 4+ products.
- Leveraged **GitHub Copilot & Cursor AI** to accelerate coding productivity by **35%** via AI-assisted code suggestions and automated testing workflows.
- Applied **Micro Frontend architecture** with CI/CD pipelines (Azure DevOps) in cross-functional Agile sprints, improving release cadence.
- Enforced **JWT auth, OAuth integration, and XSS prevention** across all applications, achieving zero critical security incidents in production.

Intrainz — FRONTEND & DATA ANALYSIS INTERN

May 2023 – Jul 2023 — Chennai, Tamil Nadu

- Built **System Prices Checker** in Python, HTML5, CSS3 with real-time API calls comparing pricing across e-commerce platforms, cutting manual effort by **50%**.
- Engineered **data visualization dashboards** with Jupyter Notebook, improving data interpretation speed by **30%** for stakeholders.

Projects

Human Resource Management System (HRMS)

Jul 2024 – Present

- Enterprise HR platform with role-based dashboards for attendance, leave approval, and analytics using **Micro Frontend** architecture; serving live production HR operations.
- Tech stack: Angular, NgRx, PrimeNG, Bootstrap 5, TypeScript.

AI-Powered Chat Application

2024 – Present

- ChatGPT-style conversational UI with real-time streaming and GenAI/LLM backend via RESTful APIs; containerised with **Docker** for scalable deployments.
- Tech stack: React.js, TypeScript, Node.js, WebSockets, Redux.

Healthcare Appointment Platform

Jul 2025 – Present

- Appointment booking, doctor scheduling and patient dashboards with secure **role-based access control** to protect sensitive health records.
- Tech stack: Angular, PrimeNG, Bootstrap 5, NgRx, TypeScript.

E-Commerce Web Application

Sep 2024 – Jan 2025

- Full-stack flower e-commerce platform with dynamic catalog, shopping cart and **JWT-authenticated** secure checkout; optimized UX reduced cart abandonment.
- Tech stack: React.js, Tailwind CSS, Bootstrap 5, Material UI, JavaScript.
Database: MongoDB.
